

# Catalyst Leadership Trust

The Catalyst Leadership Trust (CLT) is a purpose-driven, intimate community curated to help Catalyst leaders drive the change needed for the world and for their organizations.

Participants are Catalyst executives chosen for their bold strategies, innovative outlook, and proven record of business transformation and community impact. Selected members represent a wide range of industries and roles. The CLT offers connections, learning and research enriched by a diverse set of voices from the membership and the broader Samudra community ecosystem. Membership is by invitation only, and no substitutes are allowed.

## CATALYST CONSTELLATIONS MISSION

**Catalyst Constellations is a movement designed to serve Catalysts worldwide.** We help identify, recognize and accelerate the development of Catalysts for the purpose of achieving transformational outcomes.

## SAMUDRA MISSION

**Our mission is to convene, inform, and catalyze forward-thinking leaders to make a meaningful impact on their businesses, industries, and the broader communities around us.** We build an ecosystem of communities of purpose, orchestrated to forge invaluable interactions, unique research, and a diverse set of resources for our members.

## What's in it for you?

- Safe space to troubleshoot your current change initiatives with other Catalyst executives who have a demonstrated history of driving large transformational initiatives from a variety of industries and roles (i.e. Chief Innovation Officer, Chief People Officer, Chief Technology Officer, Chief Information Officer, Chief Digital Officer).
- Community dedicated to exploring the latest business-disrupting ideas and participation in provocative conversations with other future-focused leaders.
- Personal growth in how to more effectively drive change and bring others along with you.
- Catalyst leader focused research.
- An opportunity to support other Catalyst leaders who are driving big, bold change in the world.
- Access to an ecosystem of executive communities (i.e. Women Advisory Trust, Future of Work Trust, Technology Leadership Trust) including their research findings, and opportunities to join their gatherings.
- Facilitation by the thought-leaders who wrote The Catalyst Book and purpose driven-community experts.

## How is this different from other executive communities?

- The CLT focuses on who we are as individuals - as Catalysts - not our job titles or industries. As Catalysts we move through the world differently and have atypical career journeys spanning silos and sectors. Members of this community are experienced Catalysts with a demonstrated history of driving significant impact.
- This community is purpose-driven and members will support one another in tackling real-world problems.
- As a member of the CLT, you will also have access to the members, research and events of other Samudra communities.
- Our proprietary research focuses on critical challenges identified by the membership. We approach all research through the lens of transition thinking, where topics are complex, exponential in growth, and highly interconnected.
- Membership includes best-in-class technology providers who act as partners in enabling the solutions identified by the ecosystem members.

## How much time does it take?

- 2 Ecosystem-wide meetings / year (each is about one day)
- Minimum of 2 CLT-only meetings / year (scheduled to compliment the ecosystem-wide meetings)
- Many more opportunities for engagement with other community members
- Access to meetings of all the other ecosystem communities
- 1:1 connections to any of the other ecosystem members
- Opportunity to participate in one or more research interviews
